## Personal Profile

Freshly graduated student of Makers academy, studying Data Engineering whilst working as a WordPress developer for a few small-scale clients. Hard working with excellent problem-solving skills, strong observational/ collaborative skills, and quick hands-on learner, these skills have allowed me to pursue private projects both by myself and within a small team but have led me longing to develop a more substantial career in Data engineering. Previous experience in management roles has led to well-developed teamwork skills and good communicator habits, keen to help others in both work and community projects. Also, developing my ai interaction skills and a weekend greengrocer at Barnet market since 2007, which has led to great client facing communication skills and a fond, kind-hearted attitude to community interaction.

## Experience

### Proof Of Treasure – Private project

January 2022 – Present

- <https://proofoftreasure.com>
- Developing programming skills with Chialisp (token transactions).
- Building discord.py bots for community/staff interactions allowing more efficient team task management.
- Public game creation methods as well as accuracy checks.
- Working with a small developer team.

### WordPress developer/teacher – Barnet Market

December 2021 – Ongoing

- <https://barnet-market.co.uk>
